

# Session Login Integration Guide

You can integrate the session login within your website to allow participants to connect directly from your website.

Copy the following HTML code on to your website:

```
<!-- Beam2Support Session Login Start -->  
<a href="http://www.beam2support.com/en/download/connect.exe">  
</a>  
<!-- Beam2Support Session Login End -->
```

We offer several image files to choose from. Simply replace `remotesupport.gif` in the HTML code by one of the following file names:

 <p><b>Remote Support</b> Click here &gt;&gt;&gt; powered by <b>Beam2Support</b></p>	remotesupport.gif
 <p><b>Support Session</b> Click here &gt;&gt;&gt; powered by <b>Beam2Support</b></p>	supportsession.gif
 <p><b>Start Support</b> Click here &gt;&gt;&gt; powered by <b>Beam2Support</b></p>	startsupport.gif
 <p><b>Join Session</b> Click here &gt;&gt;&gt; powered by <b>Beam2Support</b></p>	joinsession.gif
 <p><b>Connect</b> Click here &gt;&gt;&gt; powered by <b>Beam2Support</b></p>	connect.gif
 <p><b>Beam2Support</b> Click here &gt;&gt;&gt; powered by <b>BeamYourScreen</b></p>	beam2support.gif

You can, of course, also use your own images. In this case, replace the full image URL from the HTML code with your own URL: `http://www.beam2support.com/images/integration/en/remotesupport.gif`

Please do not hesitate to contact us, should you have any questions.
